REPLY UNDER 37 CFR 1.116

Sir:

This amendment is being filed in reply to the outstanding Office Action, mailed September 13, 2001, in connection with the above application.

In the claims:

For the convenience of the Examiner, all claims whether or not amended are presented below.

Sub K
13

61. (Twice Amended) A method for identifying an agent which affects patched-dependent signal transduction in a cell, comprising contacting one or more test agents with a cell that expresses a wild-type patched protein and identifying test agents that affect the level of patched-dependent signal transduction relative to the absence of test agent.

62. (Twice Amended) A method for identifying an agent which affects patched-dependent signal transduction in a cell, comprising contacting one or more test agents with a cell having a
